Sigma

We work in partnership with our clients to design services and digital products that help people to live and work better.

Since 2007, our team has built a reputation for excellence in human-centred user experience, strategy, design, and development. We are more than 40 researchers, designers, developers, technical specialists, and project managers, who are based in our offices in Macclesfield and Cambridge and at client sites across the UK.

Over the last two years we've worked with NICE to research, design and build the [HealthTech Connect](#) [1] platform, supporting the adoption of transformative technologies in the UK health and care system.
